

## *1H 2026 Investor Presentation*

August 10<sup>th</sup> 2026

**Imricor's vision is to bring iMR to every cardiac centre in the world**

IMRICOR MEDICAL SYSTEMS, INC (ASX:IMR)

[WWW.IMRICOR.COM](http://WWW.IMRICOR.COM)

# Disclaimer

The material contained in this document is a presentation of general background information on Imricor Medical Systems, Inc. (**Imricor**) and its activities current as of the date of this presentation. It should be read in conjunction with Imricor's periodic and continuous disclosure announcements filed with the Australian Securities Exchange, available at [www.asx.com.au](http://www.asx.com.au).

The information is supplied in summary form and is therefore not necessarily complete. It is not intended that it be relied upon as advice to investors or potential investors, who should consider seeking independent professional advice depending upon their specific investment objectives, financial situation or particular needs. The material contained in this presentation may include information derived from publicly available sources that have not been independently verified. None of Imricor, its officers, directors, employees and agents, nor any other person makes any representation or warranty as to the accuracy, completeness or reliability of the information contained in this presentation and none of them accepts responsibility or liability for any errors or omissions in this presentation whatsoever.

Unless otherwise noted, financial information in this presentation has been prepared in accordance with accounting principles generally accepted in the U.S. (**US GAAP**) and are denominated in US dollars.

This presentation may contain statements that constitute "forward-looking statements". Forward-looking statements are statements about matters that are not historical facts. Forward-looking statements appear in a number of places in this presentation and include statements regarding Imricor's intent, belief or current expectations with respect to its business and operations, market conditions, results of operations and financial condition.

Imricor uses words such as 'will', 'may', 'expect', 'intend', 'seek', 'would', 'should', 'could', 'continue', 'plan', 'estimate', 'anticipate', 'believe', 'probability', 'risk', 'aim', or other similar words to identify forward-looking statements. These forward-looking statements reflect Imricor's current views with respect to future events and are subject to change, certain risks, uncertainties and assumptions which are, in many instances, beyond its control, and have been made based upon management's expectations and beliefs concerning future

developments and their potential effect upon Imricor. There can be no assurance that future developments will be in accordance with Imricor's expectations or that the effect of future developments on Imricor will be those anticipated. Actual results could differ materially from those which we expect, depending on the outcome of various factors. Investors and others are cautioned not to place undue reliance on forward-looking statements.

Imricor is under no obligation to update any forward-looking statements contained in this presentation, whether as a result of new information, future events or otherwise, after the date of this presentation.

Imricor's CHES Depositary Interests (**CDIs**) are traded on ASX in reliance on the safe harbour provisions of Regulation S under the US Securities Act of 1933, as amended, and in accordance with the procedures established pursuant to the provisions of a no-action letter dated 7 January 2000 given to ASX by the staff at the US Securities and Exchange Commission. The relief was given subject to certain procedures and conditions described in the no-action letter. One of the conditions is that the issuer provides notification of the Regulation S status of its securities in communications such as this presentation.

The distribution of this document outside of Australia may be restricted by law and any such restrictions should be observed. This presentation does not constitute an offer to sell, or the solicitation of an offer to buy, any securities in the United States or in any other jurisdiction.

# Imricor in 60 seconds

The only company in the world supplying the toolset required to perform cardiac ablations and other cardiac catheterisations inside an iMR lab.

## 1 What we make

Capital equipment, software and single-use consumables engineered to function safely and effectively inside a magnetic resonance field. A category pioneered by Imricor to replace X-ray guidance.

## 2 Why it matters

MR shows soft tissue (the heart). X-ray does not. MR shows scars that lead to irregular heartbeats. X-ray does not. Operators see what they are operating on with iMR, and they can visually verify the therapy they deliver. All with no radiation and no lead garments.

## 3 How we earn

Capital sale of US\$500–700k per lab installation, then a high-margin consumable and software licence annuity that recurs every year and scales with utilisation.

## 4 Where we are

Commercial in Europe and expanding indications to VT; U.S. platform now substantially cleared with commercial launch currently underway.

*An iMR lab: real-time MR guidance replaces X-ray fluoroscopy for cardiac ablation and cardiac catheter-based interventions.*

# 1H 2026 Key highlights

4

FDA clearances secured in 1H26

ALL

remaining 510(k) devices now submitted\*\*

US\$70m/A\$100m\*

net cash — funded into CY2028

## REGULATORY

### FDA CLEARANCES — 4

- ✓ Vision-MR Diagnostic Catheter — 510(k) cleared
- ✓ NorthStar — FDA cleared
- ✓ Vision-MR Diagnostic Catheter — pediatric label expansion
- ✓ NorthStar — pediatric label expansion

### SUBMITTED TO FDA — 3

- ✓ Advantage-MR System submitted to FDA
- ✓ 3<sup>rd</sup> PMA module submitted to FDA
- ✓ All remaining 510(k) devices now submitted\*\*

## CLINICAL

- VCU and Oklahoma Heart added to the VISABL-AFL clinical trial
- First-in-human iMR-guided VT ablation published in **Circulation**

## BALANCE SHEET

- Net cash of **US\$70m/A\$100m\*** — funded into CY2028

## CORPORATE

- Imricor becomes U.S. SEC registered
- Launch of **Imricor Finance** backed by DLL Group

\* Pro forma — includes marketable securities and options exercised after period end

\*\* Final 510(k) devices submitted after period end

IMRICOR MEDICAL SYSTEMS, INC (ASX:IMR)

WWW.IMRICOR.COM

# A new era is here for image guided therapies

Radiation-free, real-time soft tissue visualization — the capability an x-ray cath lab cannot deliver

## From inferring

- Radiation exposure
- Lead protection required
- No soft tissue visible under x-ray
- Point by point mapping
- Additional devices and costs
- Cannot assess lesion quality or durability

## To visualizing

- No radiation
- No lead aprons
- Soft tissue visible in exquisite detail
- Maps generated in minutes with NorthStar
- No need for ICE or mapping catheters
- Lesion quality and durability assessed in real time

# Ionizing Radiation : Shield or Remove

JULY 2026 — SIX SOCIETIES CALL FOR 'MANDATORY AND URGENT ACTION'

## Shielding the Operator Is Not the Same as Removing the Radiation

JULY 14, 2026

**Six Medical Societies Call for Immediate Adoption of Enhanced Radiation Protection in Fluoroscopy Labs**

**2,500–10,000**

Chest X-ray equivalents per 30-year career

**85%**

Operator brain tumours on the left side — facing the source

**59.8%**

Orthopaedic injury from lead aprons (49.4% in 2014)

**0.4–6.0%**

Of a child's lifetime cancer risk, per fluoro ablation

### The Radiation

- Career scatter dose equals thousands of chest X-rays
- Left-sided brain tumours cluster where the beam hits
- Pediatric ablation adds measurable lifetime cancer risk

### The Lead

- Aprons shield dose but transfer load to the spine
- Musculoskeletal injury now affects six in ten operators
- Injury prevalence has risen more than ten points since 2014

**Imricor removes the hazard rather than shielding it — iMR delivers zero ionising radiation to patient, operator, and staff.**

# Cardiac MR is a structurally growing field

Society for Cardiovascular Magnetic Resonance (SCMR) Annual Scientific Sessions, 1998–2025

**+535%**

**Attendance growth**

270 delegates (1998) to 1,714 delegates (2025)

**+643%**

**Accepted abstracts**

98 (1998) to 728 accepted from 849 submitted (2025)

**80+**

**Countries represented**

Up from 50+ in 2022; first Latin American meeting held Feb 2026

**Interventional CMR (iCMR) now has a standing pre-conference track alongside the physician and paediatric/congenital streams.**

Source: Lee, Markl et al., “The growth and evolution of cardiovascular magnetic resonance: a 20-year history of the SCMR annual scientific sessions”, Journal of Cardiovascular Magnetic Resonance (2018); SCMR annual meeting highlights papers, JCMR (2008, 2020, 2022, 2025). Attendance shown for years with published figures.

# Imricor Cardiovascular : A New Vertical

Extending real-time MR guidance from electrophysiology into cardiac catheterisation

**NEW VERTICAL**  
**Launched July 2026**

## Cath in the MR

**under real-time MR guidance**

Cardiac catheterisations, radiation-free, in one session, using the same iMR lab as EP, with a clear path to a growing number of procedures performed by interventional cardiologists

**THE ECONOMIC CASE — iMR-GUIDED RIGHT HEART CATH**

**One MR session replaces two.  
In-facility minutes per patient**

- Per-patient procedural time **-35%**
- Per-patient operational cost **-43%**
- Savings per 100 cases/yr **\$114,000**

**\$2.3M**

**added X-ray cath/EP lab revenue per 100 RHCs moved into the iMR lab**

● **The strategic logic:** moving catheterisation into the iMR lab cuts procedure time 35% and per-patient cost 43% — *and frees the X-ray cath lab* for higher-revenue interventional work.

<sup>1</sup> Total X-Ray Lab + MR Lab time = ~175mins, iMR lab single session = ~113min

<sup>2</sup> Based on time-driven activity-based costing (TDABC) methodology and modeled at the hospital direct cost level considering staff labor, facility/room cost, consumables, anesthesia medications and admin overhead.

# Imricor Cardiovascular : A New Growth Engine

A new segment that drives NorthStar sales, licence revenue and consumables pull-through

**NEW VERTICAL**  
New growth segment

## A new growth engine

**capital, licence and consumables**

Imricor Cardiovascular is a new vertical for the Company. It drives NorthStar sales, which generate upfront capital revenue and ongoing licence revenue, and it also pulls through consumables revenue as procedures are performed.

**HOW THE REVENUE BUILDS**  
One NorthStar sale, three revenue streams

Each NorthStar sale creates one new installed lab

### Capital revenue

Upfront revenue on the NorthStar system sale.

### Licence revenue

Ongoing licence revenue for as long as the iMR lab is live.

### Consumables revenue

As IC devices for iMR are released, consumable revenue grows with every procedure performed.

Capital revenue lands on installation; licence and consumables (once released) revenue recur and build as the installed base and procedure volume grow.

**Early stages of commercialisation:** Imricor will provide more detail on the per hospital economics to the business over the coming quarters as the installed base and procedure volume scale.

Illustrative of the revenue model only. No per hospital economics, figures or guidance implied.

[WWW.IMRICOR.COM](http://WWW.IMRICOR.COM)

# Electrophysiology : iMR Lab Economics

How recurring revenue builds at **each** new customer lab

ONE-TIME  
Capital revenue

**US\$500k–700k**

per lab installation

Hardware, integration and commissioning of the iMR lab. Earned once, in Year 1.

RECURRING — EVERY YEAR

Consumable revenue per lab, built from procedure mix

Atrial Flutter 100 × US\$4.0k  
**\$0.40m**

VT 100 × US\$6.5k  
**\$0.65m**

AFib 300 × US\$6.5k  
**\$1.95m**

**US\$3.0m**

recurring per lab, per year

**The investment engine:** capital revenue is earned **once** at install — the ~US\$3.0m consumable stream then recurs **every year**, scaling with utilisation and with each new lab.

THE MARKET WE ARE MOVING INTO  
**7,500+ labs × US\$3.0m per lab**

\*Assumes ~500 procedures/yr (~2/day, 5 days/wk). Larger hospitals exceed this. Future products (e.g. biopsy probe) and NorthStar software revenue not included.

WWW.IMRICOR.COM

# Delivering key milestones in 1H 2026

## Regulatory & Clinical

- FDA paediatric clearance — NorthStar and Vision-MR Diagnostic Catheter now cleared for all ages
- NavTrac Introducers submitted for 510(k); 14 of 15 submissions complete or under review
- Third PMA module submitted for the Vision-MR Ablation Catheter
- VISABL-AFL enrolling final patients across seven U.S. and EU sites
- VISABL-VT continuing at Amsterdam UMC; further EU sites to come online
- First-in-human MR-guided VT ablation published in Circulation

## Commercial

- U.S. launch commenced — Rady Children's San Diego is first U.S. customer
- Imricor Cardiovascular launched — 250+ children's and 2,000+ adult hospitals
- Further U.S. hospitals in final stages of purchasing
- Initial NorthStar revenue to exceed CY2025 European revenue
- U.S. capital sales and operations team expanding
- Philips Declaration of Compatibility received, opens Philips sites to NorthStar
- Saudi ablations and first sales hard to predict given regional conflict

## Financial

- A\$60m placement completed at A\$1.85 per CDI
- Q2 CY2026 revenue of US\$60.5k
- Operating cash outflow of ~US\$6.1m, down from US\$7.9m in Q1
- Cash and securities of ~US\$70m at 30 June 2026, pro forma for options — funded into CY2028
- Imricor Finance launched with DLL Global — hospitals finance over one to seven years, Imricor paid upfront

| <b>Underlying net loss after tax</b> | <b>(7,028)</b> | <b>(5,081)</b> |

IMRICOR MEDICAL SYSTEMS, INC (ASX:IMR)

## Commentary

- Revenue flat on prior comparative period (pcp) is the result of customer sites continuing to enrol trial patients.
- Costs and non-R&D expenses increased primarily due to sales & marketing costs (\$444), staffing costs (\$316), and professional services (\$150).
- R&D expenses increased due to higher staffing (\$563) and clinical trial spend (\$281).
- Underlying net loss of \$7 million up 38% on pcp

## Commentary

- Other non-cash adjustments decrease vs. pcg primarily due to decreases in the change in fair value charges.
- Proceeds from issuance of common stock in Q2 26 reflect proceeds from the Company's May placement.
- Total cash and marketable securities increased 34% vs. pcg

# VISABL-AFL Clinical Trial Sites

## DR. AV KOLANDAIVELU

Johns Hopkins University

"MRI is the gold standard for imaging arrhythmia causing heart characteristics, like fibrosis, and for visualizing the effects of ablation. We are enthusiastic to be a part of the FDA approval study for the Imricor ablation system."

## DR. AJAY PILLAI

Virginia Commonwealth University Health

"Imricor's Northstar mapping system and Vision-MR mapping and ablation catheters represent a paradigm shift in cardiac ablation. The potential to visualize arrhythmogenic substrate and, crucially, the effects of ablation is extraordinarily impactful and meaningful for patient outcomes."

## DR. MARCO GÖTTE

Amsterdam University Medical Center

"With MRI-guided treatment of heart conditions, we are working towards fewer procedures per patient, hospital admissions, and less medication. Perhaps MRI-guided treatment of heart disease will become the norm and replace X-ray-driven treatments."

## PROF. JUERG SCHWITTER

MD, Director Cardiac MR Centre,  
University Hospital Lausanne (CHUV)

"Many years ago in San Francisco, we did pioneering work on coronary artery disease detection by MRI. Now ischemia diagnostics by MRI is in all international guidelines. Similarly, pacemakers and defibrillators were not compatible with MRI 10 years ago. We started a collaboration with industry, and now all leading device manufactures offer a full spectrum of devices, all MRI compatible, reaching market shares up to 100%. I **believe strongly, that this evolution will also happen to the iCMR field, as it allows for high precision interventions**, where we expect higher success rate, lower relapse rate and less complications compared to conventional techniques, and all these advantages go without radiation exposure and potentially shorter interventions times."

## DR. KENNETH BILCHICK

University of Virginia Health

"Interventional CMR, particularly for electrophysiology applications, promises to advance our therapeutic strategies for patients with atrial and ventricular arrhythmias by facilitating visualization of the catheters used for ablation simultaneously with real-time CMR imaging."

## DR. EDWARD MARTIN

Oklahoma Heart Institute

"I have been involved with the imaging aspect of cardiac MRI for the last 30 years, and I have seen and participated in many exciting technological advances over that time. I am extremely excited to see the advancements... that allow expansion of cardiac MRI into interventional electrophysiology."

## DR. LAURENT FIORINA

Cardiovascular Institute of South Paris

"Performing procedures with Imricor's NorthStar 3D Mapping System is a game changer for this field, and it will have a transformative impact. I look forward to the continued partnership with Imricor."

## A strong intellectual property portfolio

**Imricor's patents protect technology that allows Imricor to manufacture medical devices that are uniquely MRI compatible.** Trade secrets, 3rd party relationships and difficult regulatory environment leave a deep moat behind Imricor.

In addition to protecting Imricor's devices and procedures, its patents provide an opportunity for the Company to license its technology to 3rd party medical device companies (particularly implant manufacturers) to help make their devices compatible with MRI.

To date, Imricor has executed 3 separate agreements where it has licensed its own patents to 3rd parties for use in implantable devices under which Imricor has received over **US\$12.9m of payments (revenue) to date.**

# Imricor Leadership: Management

**STEVE WEDAN**

*President and Chief Executive Officer, and Board Chair*

**35 years industry experience**

Designed MRI and ultrasound systems for GE Healthcare. United States appointed expert on MR safety and devices. **Credited with establishing the 4<sup>th</sup> known hazard interaction in the MRI**

**JONATHON GUT**

*Vice President of Finance and Chief Financial Officer*

**15 years industry experience**

Previous experience at Gail Medical and Boston Scientific driving financial performance, supporting business growth, and ensuring regulatory compliance. **Expertise spans various aspects of financial management, strategic planning, and operational efficiency within the medical device industry.**

**NICK CORKILL**

*Vice President of Corporate Strategy*

**16 years industry experience**

Experienced capital markets professional having spent 15 years as an equity analyst and portfolio manager at Perpetual Investments, BlackRock Inc and Lennox Capital. **Deep analytical and financial modelling skills across multiple sectors, disciplined approach to capital management.**

**JENNIFER WEISZ**

*Vice President of Regulatory and Quality*

**20 years industry experience**

Contributed to the continuous improvement of the quality and regulatory strategy, development, and implementation during tenure at Medtronic's Global Clinical Operations Quality division. **Experienced in bringing medical devices to market and ensuring their compliance with global standards.**

**VIC FABANO**

*Vice President of Operations*

**25 years industry experience**

Held executive positions in Operations, Quality, and Product Development throughout his tenure including VP of Operations and Quality at Osprey Medical. **Expert in supply chain scaling and operations infrastructure to support rapid growth, profitability, and quality for start-up to midsize medical device firms**

**GREG ENGLEHARDT**

*Vice President of Global Sales*

**20 years industry experience**

Led global business development initiatives, identifying and capitalizing on new market opportunities to drive international sales growth at NeuroMetrix. **Former combat medic in the U.S. Army**

**GREGG STENZEL**

*Vice President of Research and Development*

**25 years industry experience**

Led the Instrument Technical Operations division at Beckman Coulter, Inc., a leading manufacturer of In Vitro Diagnostic Systems. **Seasoned executive with expertise in new product development, supply chain management, quality and regulatory systems, and customer support.**

**NICK TWOHY**

*Vice President of Marketing and Business Development*

**20 years industry experience**

Directed international market strategies for Medtronic's Cardiac Resynchronisation Therapies business **Led the successful US launch of the Medtronic Revo MRI pacemaker system, enhancing market.**

**KATE LINDBORG, PHD**

*Vice President of Clinical Affairs*

**13 years industry experience**

Managed a portfolio of clinical trials within Medtronic's Cardiac Rhythm and Heart Failure and Diagnostics Clinical division to gain and maintain market approval of novel devices. **Oversaw the generation and dissemination of clinical evidence, enhancing the scientific credibility and market positioning of Medtronic's products.**

**ERIKA MERRICK**

*Vice President of Enterprise Performance*

**15 years industry experience**

Ms Merrick joined Imricor in 2026 and is responsible for driving enterprise-wide performance and execution of strategic goals. **She has over 15 years of medical device experience, including senior roles at Coloplast, Boston Scientific, Medtronic, and American Medical Systems, spanning quality systems, product development, M&A integration, and global portfolio management.**

IMRICOR MEDICAL SYSTEMS, INC (ASX:IMR)

# Imricor Leadership: Board of directors

**STEVE WEDAN**

*President and Chief Executive Officer, and Board Chair*

Designed MRI and ultrasound systems for GE Healthcare. United States appointed expert on MR safety. Mr Wedan is a member of various international standards committees in the fields of MRI safety and the compatibility of implanted and interventional products in MRI

Credited with establishing the 4<sup>th</sup> known hazard interaction in the MRI

**MARK TIBBLES**

*Deputy Chair and Lead Independent Director*

Entrepreneur, business owner, company director and active venture investor in and advisor to technology, life science and medical device companies

Owner and managing member of STEM Fuse, LLC, one of the largest providers of digital K-12 STEM curriculum in the U.S.

Managing Director of Strategic Stage Ventures, LLC.

**PETER MCGREGOR**

*Non-executive Director*

Extensive finance management background including partner positions at Goldman Sachs JBWere, and managing director in the institutional banking & markets division of Commonwealth Bank of Australia

Currently serves as a Director of Treasury Corporation of Victoria and True Infrastructure Management Pty Ltd.

**ANITA MESSAL**

*Non-executive Director*

Comprehensive background in health care and benefits industry, including the successful integration of merged and acquired entities across all areas of the business at AccentCare

Vast background in working with both Fortune 100 and startup companies in public, private and non-profit sectors in both domestic and international markets

**JEFFREY LEIGHTON**

*Non-executive Director*

Dr Leighton is a cognitive neuroscientist with extensive experience in both academic and corporate settings. He holds a PhD in Cognitive Psychology from Grand Canyon University and has a robust research, teaching, and leadership background.

Beyond his academic achievements, Dr Leighton has demonstrated strong business acumen as CFO at NDS Wellness.

Dr Leighton has held key corporate governance and advisory roles.

**ALDO DENTI**

*Non-executive Director*

Mr Denti has over 30 years of global experience in the medical device industry. Mr Denti is currently the Chief Commercial Officer for Dentsply Sirona. Prior to this role, he was the Company Group Chairman of Global Orthopaedics for Johnson & Johnson MedTech. Since becoming Company Group Chairman in 2019, Mr Denti grew the business to US\$9 billion in annual sales, making it the world's largest orthopaedics company. Mr Denti was responsible for leading a staff of over 25,000 employees.

Prior to his role in orthopaedics, Mr Denti served as Global Leader at Johnson & Johnson Vision, where he modernized the organization and introduced critical new skill sets in strategic planning, insights & analytics, e-commerce, and business model innovation. Mr Denti holds a Bachelor of Arts, with Specialised Honors, from York University
